

Product Announcement

EZ Launch® for Kayaks & Canoes and The EZ Launch® Accessible Transfer System combine to provide an Unparalleled, Universally Accessible Kayak and Canoe Launching System

500950, 500952, 500953, 500954, 500955, 500956, 500957, 500900L, 500900R, 500906L, 500906R, 500890, 500960, 500962L, 500962R, 500963L, 500901L, 500901R, and 500963R

Implementation Date: May 2010

EZ Launch for Kayaks & Canoes and Accessible Transfer System

EZ Launch® for Kayaks & Canoes and EZ Launch® Accessible Transfer System

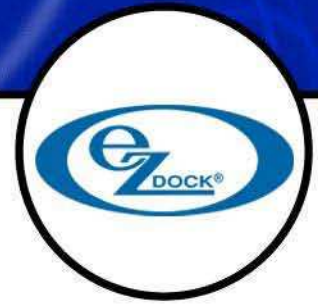

The EZ Launch for Kayaks and Canoes was the first port system built specifically for paddlers. It's so simple and safe to use that everyone will find boarding, launching and recovery a breeze. The rollers and guide rails make it easy to "glide" on and off. It can even be configured for universal accessibility that exceeds the requirements of the ADA. EZ Launch is a floating system that adjusts to changing water levels. It provides ample "foot space" on both sides and in the front to allow for optimum access and stability. Simply put, EZ Launch provides unparalleled ease and safe access for all paddlers of all abilities, along with their gear and their vessels, when launching and docking.

The addition of the new EZ Launch Accessible Transfer System is another first that provides accessibility for individuals with disabilities. The all new EZ Launch Accessible Transfer System offers a Transfer Bench with choices of variable heights that allows easy transfer from most wheelchairs to most kayaks and canoes. The Transfer Bench has two heights for transfer from different wheelchairs and two Transfer Slide Boards to accommodate different watercraft heights. The Transfer Slide Board lands securely on a railing system that stabilizes it and provides grab bar transfer assistance for easy side movement. It is constructed of all marine grade components and the primary component is anodized aluminum. The EZ Launch Accessible Transfer System comes complete with Transfer Bench, mating support/grab rail, and all necessary hardware to attach to a standard EZ Launch System that has at least two 80"x 10' docks .
