EZ Dock Pontoon Lift Packages and Components PL2000, PL3500, and TMS200

Implementation Date: January 2013

PL2000 and PL3500

Features and Benefits

Introducing the Patented EZ Dock Pontoon Lift- This new Pontoon Lift comes in two different models; the PL2000 for standard pontoon boats up to 2000 pounds and the PL3500 for standard pontoons boats up to 3500 pounds. This system offers a unique drive-on solution for pontoon boats. The air-assisted units offer a choice of control units that include: standard AC powered pump with manual controls; DC battery powered pump with solar charging system and manual controls (deep cycle battery not included), an AC powered remote control pump unit, and an DC remote controlled pump unit. These systems are designed for standard pontoon boats with a center to center pontoon dimension of 70"-84".

- Drive-On System- Allows for immediate positive contact between the boat and lift which automatically aligns the boat for you. This makes for a stable porting experience in strong current or windy conditions.
- Modular System- Allows for expanding or reconfiguring your boatlift/dock by simply adding or moving components. Can be used with standard EZ Dock, traditional floating or fixed docks.
- Air-Assist Pump Unit- There are five air-assist pump unit options available: standard AC powered pump with manual controls; DC battery powered pump with solar charging system with manual controls (deep cycle battery not included), an AC powered remote controlled pump unit, an solar charged remote system, and an European 220vDC system. All pump units provide easy, hassle free operation with an approximate lift time of 30-90 seconds.
- Versatile mounting and attachment options allow for multiple installation methods.
- Complete Platform Design- Safe and Easy to use without any open areas or exposed metal.
- Durable- Made completely out of marine grade materials.
- Adjustability- The Underwater Finger Stiffener allows for width adjustment to match the boat beam width.
